

boom2box

Syncs LRA motion to audio for low frequency emphasis

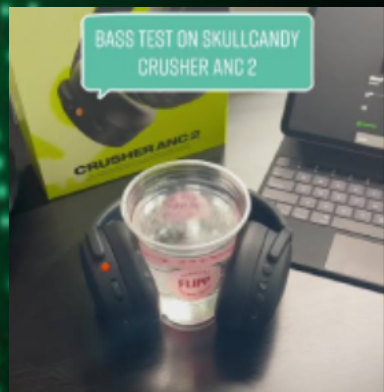

Want your headphones to shake like an unbalanced washing machine?

A driver that adapts LF signals from music to LRAs mounted on headphones to enhance felt bass experience.

- Bluetooth slave with 3.5 out
- Supports any LRA
- Closed loop control
- 0.5A per LRA output
- 25-1000Hz output
- 50-300Hz automatic f0 tracking

Exceeds/mimics effects of commercial solutions
